

Enviro Privacy Policy

Last Updated: May 2026

Welcome to Enviro. We are committed to protecting your personal information and your right to privacy. This Privacy Policy explains how we collect, use, disclose, and safeguard your information when you use our mobile application, web dashboard, and associated IoT hardware devices (collectively, the "Platform").

1. Information We Collect

To provide you with our smart urban farming ecosystem, we must collect certain information from you and your hardware:

A. Personal and Account Information

- Profile Data: Name, username, email address, and password used to register for the Platform.
- Preferences: App settings, preferences, and notification configurations.

B. Hardware and Sensor Data (IoT Telemetry)

When you pair an Enviro microcontroller edge node to the Platform, we continuously collect and process telemetry data. This includes:

- Water consumption metrics (e.g., liters of water saved).
- Hardware status, connectivity logs, and device identifiers.

C. Camera and Image Data

To utilize the AI Disease Scanner, the Platform requires access to your device's native camera. We collect the images of plant leaves you capture to process them through our Convolutional Neural Network (CNN) models for disease diagnosis and treatment recommendations. You must grant explicit permission to access your camera.

D. Location Information

We request access to your geographic location to pull accurate, real-time meteorological data from third-party weather APIs. This allows the Platform to display local weather safety alerts and adjust predictive watering schedules based on local precipitation and storm forecasts.

2. How We Use Your Information

We use the collected information for the following purposes:

- To Operate the Platform: Managing your account, pairing new sensor nodes, and executing autonomous irrigation protocols.
- To Power AI Diagnostics: Running your uploaded images through our machine learning pipeline to identify plant pathology and provide actionable "Smart Pharmacy" recommendations.
- To Improve Our Ecosystem: Aggregating anonymized sensor and disease data to improve our machine learning models and hardware efficiency over time.
- To Process Transactions: Facilitating orders for replacement parts, seeds, and treatments through the Enviro Shop (when active).

3. Data Sharing and Disclosure

We do not sell your personal data. We may share your information only in the following situations:

- Cloud Service Providers: We use secure, third-party cloud infrastructure (such as MongoDB clusters and NodeJS hosting environments) to store and process your data.
- Legal Obligations: If required by law, we will disclose information to comply with legal proceedings or governmental requests.

4. Data Security

We implement industry-standard administrative, technical, and physical security measures to protect your personal information and hardware telemetry. While we strive to use commercially acceptable means to protect your data across our Admin Command Center and APIs, no method of transmission over the internet is 100% secure.

5. Your Privacy Rights

Depending on your location, you may have the right to:

- Access, update, or delete the information we have on you via the "Manage Profile" section.
- Revoke camera or location permissions at any time through your device's native OS settings (note: this will disable the AI Scanner and localized weather features).

6. Contact Us

If you have questions or comments about this Privacy Policy, the AI models, or your hardware data, please contact the Enviro technical team.
